ARM Linux mail list

linux-arm-kernel --

About linux-arm-kernel

English (USA)

To see the collection of prior postings to the list, visit the [linux-arm-kernel Archives](#).

Using linux-arm-kernel

To post a message to all the list members, send email to linux-arm-kernel@lists.infradead.org.

You can subscribe to the list, or change your existing subscription, in the sections below.

Subscribing to linux-arm-kernel

Subscribe to linux-arm-kernel by filling out the following form. You will be sent email requesting confirmation, to prevent others from gratuitously subscribing you. This is a private list, which means that the list of members is not available to non-members.

Your email address:

Your name (optional):

You may enter a privacy password below. This provides only mild security, but should prevent others from messing with your subscription. **Do not use a valuable password** as it will occasionally be emailed back to you in cleartext.

If you choose not to enter a password, one will be automatically generated for you, and it will be sent to you once you've confirmed your subscription. You can always request a mail-back of your password when you edit your personal options. Once a month, your password will be emailed to you as a reminder.

Pick a password:

Reenter password to confirm:

Which language do you prefer to display your messages? English (USA)

Would you like to receive list mail batched in a daily digest? No Yes

linux-arm-kernel Subscribers

How to use mail lists

- ❑ Pure Text: LKML and others hosted on vger.kernel.org that see html messages as a signature of spam.
- ❑ Don't top post

How to config “git send-email”

[user]

Make a patch

```
# git format-patch a5d0e7c0371~1..a5d0e7c0371
```

```
0001-tipc-fix-spinlock-recursion-bug-for-failed-subscript.patch
```

Make a patch set

```
# git format-patch a5d0e7c0371~4..a5d0e7c0371 --cover-letter  
0000-cover-letter.patch  
0001-netpoll-fix-the-skp-check-in-pkt_is_ns.patch  
0002-net-davinci_emac-Replace-devm_request_irq-with-reque.patch  
0003-net-davinci_emac-Fix-rollback-of-emac_dev_open.patch  
0004-vxlan-fix-nonfunctional-neigh_reduce.patch  
0005-tipc-fix-spinlock-recursion-bug-for-failed-subscript.patch
```

Cover Letter

From a5d0e7c037119484a7006b883618bfa87996cb41 Mon Sep 17 00:00:00 2001

From: Barry Song <...>

Date: Wed, 2 Apr 2014 10:49:20 +0800

Subject: [PATCH 0/5] *** SUBJECT HERE ***

*** BLURB HERE ***

Christian Riesch (2):

net: davinci_emac: Replace devm_request_irq with request_irq

net: davinci_emac: Fix rollback of emac_dev_open()

David Stevens (1):

vxlان: fix nonfunctional neigh_reduce()

Erik Hugne (1):

tipc: fix spinlock recursion bug for failed subscriptions

Li RongQing (1):

netpoll: fix the skb check in pkt_is_ns

Get Maintainers for your patches

Updated - Please read
(October 14, 2009)

ID Nr	Summary	Version	Date (UTC)
1/1	small system.h patch		04 Jul 1998
2/1	init patch		04 Jul 1998
3/1	setup.c patch		04 Jul 1998
4/1	partitions patch		04 Jul 1998
5/1	small serial-card patch		04 Jul 1998
7/1	support for DMA cache coherency		08 Jul 1998
8/1	mm stuff		08 Jul 1998
9/2	updated 21285 patch		19 Jul 1998
10/1	nexuspci arch updates		08 Jul 1998
13/1	resend: stroke watchdog while uncompressing		20 Jul 1998
15/1	resend: machine.h / head.S		20 Jul 1998
16/1	Patch for 2.0.35 for old machines		16 Aug 1998
17/1	resend: don't compile Acorn font on all ARM machines		16 Aug 1998
21/1	support PCI IDE devices		16 Aug 1998
22/1	another machine-type patch		17 Aug 1998
23/1	ADFS limited writability		17 Aug 1998
24/1	PCI IDE fix for AL5229		23 Aug 1998
25/1	small mem.c change for machines with no console		24 Aug 1998

Help of Russell King's Patch System

<http://www.arm.linux.org.uk/developer/patches/info.php>

- ❑ Please omit [PATCH] and other "useful" prefixes.
- ❑ The patch system now accepts two different forms of terminating the description. Both are described here, please use only one form.
 - On a blank line "PATCH FOLLOWS" (without the quotes). There must be no space or tab characters before or after these words on this line.
 - On a blank line "---" (three minus-signs without the quotes). Again, there must be no space or tab characters before or after this symbol.
- ❑ On a separate line, add a tag "KernelVersion: " followed by the kernel version that the patch was generated against. This should be formatted as "KernelVersion: 2.6.0-rmk1"

Linux versions (Cont.)

When your patches will be in mainline

- Patches will show in subsystem trees at first
- Then in the merge window, the feature will show in 3.xx-rc1
- Bug fixes for 3.xx will show in 3.xx-rc2~8
- Bug fixes suitable for old versions might also show in 3.xx.yy(stable Linux version)

THANK YOU
